

CBC Specifications for Pool Lifts

Code #	Description	RMT Aquatics Lifts
4.1.1	The seat must be rigid	All seats are fabricated using a rigid, yet comfortable, plastic material
4.1.2	The seat must be not less than 17-inches and no more than 19-inches, inclusive of any cushioned surface which might be provided, above the pool deck	All lifts seats can be positioned to be within 17-19 inches above pool deck.
4.1.3	The seat must have two armrests. The arm rest on the side of the seat by which access is gained shall be either removable or fold clear of the seat	Armrests are available for purchase as an accessory for all lifts. Two removable and foldable armrests are furnished with purchase, allowing access from either side of the seat to accommodate people who have difficulty transferring from one side.
4.1.4	The seat must have a back support that is at least 12-inches tall	The seat back extends 24 inches high from the base of the seat for all lifts
4.1.5	The seat must have an occupant restraint for use by the occupant of the seat and the restraint must meet the standards for operable controls in compliance with Section 1117B.6—4	Seat belts are a standard provision for all lifts. Additionally, a Stability Vest is offered as an additional accessory for all lifts for those with limited or no upper body mobility.
4.2	Be capable of unassisted operation from both the deck and water levels	All lifts come with a completely waterproof remote control that is attached to the lift and is accessible from both the deck and water level
4.3	Be stable and not permit unintended movement when a person is getting into or out of the seat.	All lifts are built using a robust stainless steel frame that provides for stable transfer.
4.4	Be designed to have a live-load capacity of no less than 300 pounds.	All lifts have a live-load capacity of no less than 300 pounds. The Splash! HD lift will transfer users up to 400lbs.
4.5	Be positioned so that, if the pool has water of different depths, it will place the operator into water that is at least three feet below the surface of the water.	RMT Aquatics requires that our Engineer sign off on pool configuration to ensure that the lift is placed in the proper location by the pool.
4.6	Lower the operator into the water at least 18-inches below the surface of the water.	All lifts will accommodate this requirement when installed in accordance with our Engineer's specifications.
